February 15, 2024

Report

The statistical programming language R was used to acquire, clean, and process the data (R Core Team 2023). In particular, the following R packages were used: tidyverse (Wickham et al. 2019), readxl (Wickham and Bryan 2023), haven (Wickham, Miller, and Smith 2023), ggthemes (Arnold 2024), and ggplot2 (Wickham 2016).

Three figures from *Energy Saving May Kill: Evidence from the Fukushima Nuclear Accident* by He and Tanaka (2019) were reproduced:

- Figure 1 is a reproduction of Figure 1A. from He and Tanaka (2019).
- Figure 2 is a reproduction of Figure 1B. from He and Tanaka (2019).
- Figure 3 is a reproduction of Figure G1. from He and Tanaka (2019).

*Code and data are available at: <https://github.com/apang00/Energy-Policy.git>

FIGURE 1: Domestic Nuclear Energy Production

FIGURE 2: Relative Electricity Consumption and Price

FIGURE 3: Mortality Rate and Energy Policy
